OKIPAGE® 10ex

DIGITAL LED PRINTER

Professional Desktop Printing.

To propel your company into the future, you need technology that fits the way you work. You need the OKIPAGE® 10ex, the best-featured desktop printer in its class. This digital LED printer combines professional performance with exceptional value, for years of high-quality documents and low ongoing operating costs.

Not only does it print at a fast 10 pages per minute, its 28 MHz microprocessor clocks an impressive 12-second time to first page. It offers 600 x 600 dpi for clear, sharp text as well as an impressive 600 x 1200 dpi for graphics. And, for sheer turbocharged durability, it has a duty cycle rated at 15,000-pages per month — so it'll keep turning out those handsome documents day after day.

The OKIPAGE 10ex has a fully enclosed 250-sheet paper tray, and its paper capacity can be expanded — with the optional 500-sheet 2nd tray mechanism and 100-sheet/50-envelope power feeder — to 850 sheets. It handles a wide range of media types and sizes, from letter to legal, labels to overhead transparencies.

Enhanced Memory Management (EMM) powers up the 2 MB of standard RAM into an effective 4 MB, which is upgradable to 35 MB via an optional memory expansion board and industry-standard SIMMs.

The OKIPAGE 10ex is at home in virtually any business environment. It's compatible with Windows 98, 95, 3.1x, NT 4.0 and MS-DOS®. It also features Epson® FX and IBM® ProPrinter® III XL emulations. And it integrates seamlessly into PCL®-driven stand-alone or peer-to-peer configurations, as well as UNIX® and other non-Windows platforms.

The printer's small footprint enables you to put it right on your desk — or just about anywhere else — and printing functions can be controlled directly from your PC with simple point-and-click, or manually via the easy-to-use operator panel. With its Energy Star® compliance, the OKIPAGE 10ex is environmentally friendly, too.

If you're looking for professional features and versatility to fit the way you work, the OKIPAGE 10ex can put you on the fast track to success.

Best-featured desktop business printer in its class.

OKI®
People to People Technology™

Technology-driven reliability. Industry-leading support.

Driving the performance of the OKIPAGE 10ex is OKI Digital LED Technology.

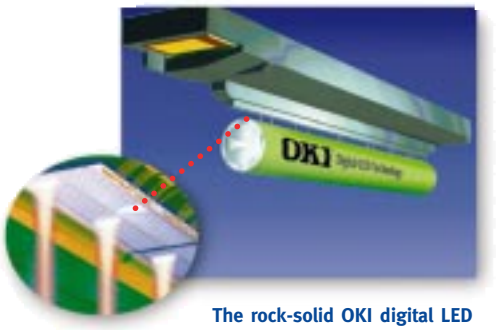
Unlike lasers, which print through a complicated series of rotating mirrors and moving parts, the OKI printing process uses flashing pin-point beams of light that go straight to the image drum. All rock-solid state. No smoke. No mirrors. No moving parts. It's simply a more sensible technology: Digital LED printing. Simply smarter than laser.™

And because it's so reliable, you'll be able to count on your investment for years to come.

OKI backs it with a 1-year limited warranty on parts and labor with Overnight Exchange[1], and the only 5-year printhead warranty in the business.

Should you ever need technical assistance, count on OKIcare™ service and support. Simply call our customer support hotline[1]: 1-800-OKIDATA (800-654-3282) and speak to a live service representative, 7 days a week, 24 hours a day, 365 days a year.

For more information on the OKIPAGE 10ex or other OKI® printers, visit our web site at www.okidata.com. Or, for the OKI dealer nearest you, call 1-800-OKIDATA.



The rock-solid OKI digital LED printhead utilizes a stationary array of pulsing light-emitting diodes (detail) to create high-resolution text and graphics.
